

PROSPECTUS

GEETANJALI

PUBLIC SCHOOL

“Everyone has dreams, when such dreams turn into reality it makes mark on humanity. Evolution of our Institution is poised to create minds for betterment of society. Dedication and determination are like body & soul for progress and commitment for our Institution”.

Geetaanjali Public School takes pride in providing an atmosphere where young minds are nurtured for future challenges. We as a school are dedicated to inculcate moral values, honesty, civility, kindness and respect in our students.

We instill in our students great discipline, intense determination and passion to do extremely well which are the merits required to meet the challenges of the modern society. In addition to educational brilliance, our school puts great emphasis on traditional values.

Besides academic excellence, the School is committed to inculcating in all its students, strong ethical values of integrity, politeness and compassion. We believe that education should foster confidence, discipline, clarity in thought and decision-making ability to set and achieve goals, and above all, social responsibility as a life-long value.

Our students are known for great self-discipline, intense perseverance and zeal to excel. The school seeks your utmost co-operation and support at all times to achieve these high standards of education.

“Education, Dedication, Precision, Courage, Discipline and knowledge is our passport to the future. Tomorrow belongs to those people who prepare for it today.”

AIMS AND OBJECTIVES

- Creating an environment that is conducive to the growth and discipline of children, ensuring they become responsible and motivated individuals.
- To equip children with the right skills in academic along with social attributes so that they become all round leaders.
- Deliver curriculum that is unique in a way stimulating and challenging children to bring out their innovative best.
- Encourage socio educational system, where students learn to respect people from all backgrounds, where they learn to share, work, interact and co-exist without any discrimination.

- Give students the opportunity to learn and be inspired by our rich past, to examine and imbibe knowledge from the present and to plan for their bright future.
- Acknowledge and celebrate the personal achievements and contributions of students, no matter how big or small.

We believe that the students and parents have multifarious academic dreams. Geetaanjali Public School has a strong team of experts with high qualifications and experience to help these dreams come true. We, as a school are continuously making great progress in academics, social programs and infrastructure facilities since establishment. The healthy school atmosphere is reflected in various ongoing academics and co-curricular programs.

GPS was established with a specific vision and a firm conviction that we will march ahead on the path of imparting quality education to the aspiring students. The school will always try its best to cater to the needs of the changing environment. Friendly learning environment, coupled with the regular sports and other extra –curricular activities are conducive to a child’s growth.

I express my gratitude and also congratulate our teaching & non teaching staff, students and our generous public for their sincere and benevolent co-operation in this noble venture and vision.

With Best Wishes.

Principal

Geetaanjali Public School focuses to educate and inspire individuals, who will go on to become the leaders of the world tomorrow. It is our vision to provide them quality education and inspire them with encouragement and innovative thinking.

Geetaanjali Public School (GPS) is an un-aided private school governed by the Human Development and Educational Society, Rewa (Reg. No. 461). The school started its functioning on 9th of April, 2009 from Civil Lines; Rewa. Mr. Shiv Prasad Pradhan & Mrs. Aruna Pradhan are the founders who planted this sapling of education with an aim of providing quality education and all round harmonious development of the students. This sapling has grown to become 'A Tree of Knowledge' so the students can grow under its shade and shelter and start their journey on a path of progress.

The hard work and efficient efforts of teachers bring remarkable changes in a student’s progress. The students are looked after carefully and affectionately. The school provides students with adequate environment and supervision, preparing them to be future leaders of their fields.

GPS has 3 campuses around Rewa i.e. Civil Lines, Maidani and Mangawa. All three branches are conveniently located eco friendly and built keeping in mind students' safety. It has developed an excellent infrastructure for scholastic and non-scholastic development of the students. GPS has a combined strength of 1800 + students.

GPS Maidani has a state-of-the-art campus. The school is Senior Secondary, offering Commerce and Sciences subjects in 11th & 12th classes. It is affiliated to the Central Board of Secondary Education (CBSE). The school is working on providing world-class facilities, for better teaching and international standard sports. The campus is located in the centre of Rewa city in an eco-friendly and peaceful environment that makes it an ideal place for students to thrive and learn.

OUR TEACHING METHODS

The teaching method in GPS is based on one simple thought – every student is unique and has to be taught in a way best suited to his intellectual abilities. Our method is individual centric where we focus on every child and help him or her learn and perform to the best of her abilities. We have a student-teacher ratio of 20:1. This ensures that every student gets opportunities to reach his/her full potential through curriculum and practical learning.

Interactive learning is one of the way we teach in GPS. This mode of teaching includes games, quizzes, puzzles, slideshows, mind map, etc. We've collaborated with various large educational research companies from across the world to help develop a system that is rich in activity and content.

The school has programs that help students to improve their academic performance by activating both parts of the brain. This advanced aided learning facility allows students to explore their creative and rational abilities. It makes teaching much easier with practical explanations.

Our unique system is designed to help students enhance their concentration and their interest level by involving many practical learning tools. As opposed to complete text book learning, this teaching method helps students retain what they've learnt for a longer period of time.

Parts of the syllabus are also practiced in the scientific virtual laboratory where students get to learn on their specifications and can see the LIVE reactions in the lab. In all, the system is developed to strike the perfect harmony between syllabus and audio visual technology. Therefore enabling a healthy learning and teaching environment.

OUR FACULTY

Our staff is qualified and dedicated. They are equipped to teach and enlighten every curious mind. To aid the evaluation of each student, we've taken guidance by CBSE training programs. We have an evaluation system that monitors each teacher's performance in an

ongoing process throughout the year. The teaching skills are measured through various parameters ensuring their competence towards curriculum and education. This results in better performance of by our students.

OUR STUDENT DEVELOPMENT SYSTEM

As a school, we encourage full interaction with parents and guardians at all levels on a regular basis to monitor growth of their wards. This brings to light the improvement areas of the student and a better understanding of his/her capabilities.

To further help children learn on their own, assignments are given and graded periodically. Frequent tasks at school and home help us grade the level of achievement and progress made by the child.

Projects based work is a way to keep students motivated and intellectually challenge them from time to time. This helps them get hands on with the knowledge of what they learn at school. These projects also help students develop skills that'll be beneficial in the long run. Some of these skills include decision making, problem solving, investigating and enquiring experimentally.

Overall, the aim is to enable students to think analytically, creatively and solve problems from a very practical perspective. Integration with other subjects gives them a broader context.

Communication (Spoken English) is crucial to success in all walks of life today. That's why every student is encouraged to develop their skills through number of activities like drama, debates & declamation and public speaking. We've also made it compulsory for students and teachers to speak in English when in campus.

EDUCATIONAL FIELD TRIPS

We create enriching experiences by exposing students to real life scenarios during their schooling. This facilitates them to see and understand facts and concepts better. Field visits help a young mind, experience new things and become a great stimulant an excellent way to learn.

COMPETITIVE EXAMS

At GPS, each student is given opportunities to compete in various exams and activities. This test of mental acuity is a way of preparing students for higher exams, once their schooling is complete.

INFORMATION SYSTEMS

GPS provides state-of-the-art virtual/ digital information system. This system is designed for students of all ages, starting from Nursery onwards. We help students to keep pace with the emerging world of information. We've got a computer lab and computer education is compulsory from class I onwards. We use STEM technology, which has 3D modules for Science and Mathematics.

CO-CURRICULAR ACTIVITIES

There's more to learning than text-books and blackboards. At GPS, there is a wide variety of extra-curricular activities designed for every interest and talent. From cultural shows to general knowledge quiz, to elocution, music and arts, there's something for every student. We encourage our star performers to participate on district and national levels.

GAMES & SPORTS

GPS also focuses on sports, we provide students with facility in sports like Cricket, Swimming, Badminton, Table-Tennis, Athletics, PT, Kho-Kho, Yoga, Karate, Cycling, etc. Training is extended by qualified, experienced and efficient instructors.

THE KINDERGARTEN

The kindergarten section of our school is designed with age appropriate, scientifically designed and well planned syllabus to encourage, motivate and help little ones grasp the new school experience. We strive to make a child's first step into formal education by enriching his experience through learning techniques using games & activities; arts & crafts; magic shows; story enactment; role plays and much more. These activities help the child hone his/her skills and also to develop a personality. Our innovative methodology is very effective and is aimed at breaking the monotony of classroom teaching to make way for more interactive and inclusive teaching methods that help the child grow.

SECURITY & SURVEILLANCE

CCTV cameras in every nook and corner of the school have been put up for surveillance to ensure students' safety.

ADMISSION & ELIGIBILITY

Pre-primary admissions require both the child and the parents to be present for a discussion/ interaction before the admission. The school is open for admission to all children. The admission to any class is governed by the stipulated seats available in each

class. School has classes up to Senior Secondary level offering both streams of Commerce/ Sciences (Bio/Maths) with physical education and IT as optional subjects in classes 11th & 12th.

The admission to all classes from I to IX is governed by the stipulated seats available in each class, merit is given preference over any other criterion.
